Objective

The Fund aims to track an index (before fees and expenses) that comprises 150 global companies (ex-Australia) ranked by highest quality score.

Benefits

A quality investment approach

The Fund aims to track the performance of an index that has been designed to select quality global companies based on high return on equity and profitability, low leverage and earnings stability.

Outperformance potential

The Fund's index methodology aims to produce long-term performance superior to that of benchmark global equities indices.

Portfolio diversification

The Fund provides exposure to companies from a broad range of global locations (ex-Australia) and across a wide range of sectors, many of which are under-represented in the Australian and NZ sharemarkets.

Cost-effective

With annual fund charges of only 0.49% (or \$49 for every \$10,000 invested), the Fund is a cost-effective solution for investors seeking exposure to the performance of quality global companies.*

*Other costs, such as transaction costs, may apply. See PDS for more information.
