Objective

The Fund aims to track the performance of an index (before fees and expenses) that includes a portfolio of large global stocks identified as 'Climate Leaders' that have also passed screens to exclude companies with direct or significant exposure to fossil fuels or engaged in activities deemed inconsistent with responsible investment considerations.

Benefits

A 'true to label' ethical solution

The Fund combines positive climate leadership screens with a broad set of negative screens to exclude investment in companies whose activities have detrimental impacts on people, society, or the environment.

Industry-certification

The Fund currently gains its exposure via the Betashares Global Sustainability Leaders ETF (ASX code: ETHI). ETHI has been certified by the Responsible Investment Association Australasia (RIAA)¹.

Transparent

The Fund's portfolio holdings exposure and net asset value per unit are available daily on our website.

Low cost

The Fund aims to track the performance of an index, so there are no 'active manager' fees.
